

HAPPY HALLOWEEN

**This isn't a  
Ghost shark...**

**...and neither is  
this \*ahem\*  
ghost...**

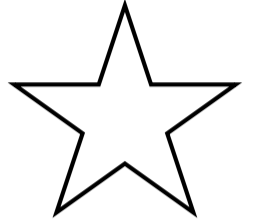

**This is a Ghost Shark!**

# Ghost Shark Fact Sheet

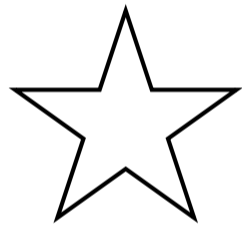

## What are they?

- Ghost sharks are fish. Although they're small (about the size of a mailbox) they are also called elephant fish
- They are a close relative of sharks and rays
- They can live up to 15 years!

## Where do they live?

- Ghost sharks live in the deep sea where it's always dark!
- They can be found in Australia and New Zealand

## Did you know?

Ghost Sharks use their nose like a metal detector to find yummy prey species buried in the sea floor!
